Employer: IMTC

Title: Fullstack Developer (Full-Time)

Location: Hybrid, Preference for New York City area.

The Company

IMTC is a NYC-based, venture-backed FinTech company, creating innovative technology solutions for fixed income professionals. IMTC's first-of-its-kind, cloud-based platform enables users to leverage a highly dynamic optimization engine along with a suite of automation tools to manage bond portfolios for retail and institutional clients. The combination of intuitive interfaces and purpose-built tools helps streamline time-intensive workflows so our clients can focus on high value work.

IMTC brings long awaited change to fixed income workflows. The platform enables customization on a massive scale allowing firms to grow their businesses and launch new products. By automating manual processes and optimizing decision-making, IMTC helps clients achieve faster, more accurate, and more compliant investment decisions across portfolios, simultaneously.

IMTC delivers end-to-end functionality, including portfolio construction, order management, analytics, reporting, compliance, risk management, and live pricing. With managed data services and an extensive network of integrations, IMTC ensures seamless connectivity by aggregating and centralizing data from a wide range of industry providers. Recognized for innovation and technology, IMTC stands as the only cloud-native tool dedicated to fixed income, providing flexibility, compliance, and comprehensive coverage across taxable and non-taxable markets.

The IMTC team combines fixed income industry expertise with experienced software developers to provide next-generation technology, delivering long-overdue automation and scale to fixed income teams. Today, IMTC proudly serves some of the country's top asset managers, Trust companies, RIAs, Broker-Dealers and ETF managers.

The Opportunity

You will be part of a team designing and developing advanced cloud solutions on MS Azure, with a foundation in agile working methods, DevOps, and Test-Driven Development. Given the frequency of our product releases, we have developed a toolbox of agile development practices which allow our Dev Team to release code in a highly dynamic flow. This means you can expect to see your own code in production during your first week on the job, whether you're at the beginning of your career or with several years of experience.

In addition to deploying continuous releases into production, automation is central to our development pipeline – everything from unit tests to integration tests, UI tests, and performance tests. As such, we avoid repetitive processes and in turn foster innovation and creativity. With this comes faster, higher-quality solutions and a greater business value.

And, you will have the opportunity to learn from and work with seasoned technologists to effect real change in an industry ripe for disruption.

If you are looking for a challenge, we want to hear from you!

Responsibilities:

- Develop high quality software under the direction of Tech Lead and Team Lead
- Develop both frontend and backend functionality
- Conduct tests to ensure responsiveness and efficiency
- Troubleshoot, debug and upgrade software
- Maintain and deploy software

Qualifications:

- Master's degree in software development
- Minimum 5 years' experience with US-based software development teams
- Experience with C# and TypeScript
- Deep care for code quality and confidence in writing testable code
- Experience with frontend development, preferably Angular
- Experience with cloud infrastructure, preferably Azure
- Experience with Fixed Income is an advantage
- Used to work with version control such as Git
- Desire to work with the latest technologies in Azure and .NET Core
- Desire to be part of an agile setup, where demands and direction can quickly change but where co-determination and freedom are paramount
- Full authorization to work in the US without any sponsorship requirements

What we offer:

- Exciting, face-paced work environment
- Hands-on experience in a startup with experienced founders
- Opportunity to assist in the development of next generation financial market software platform with a focus on optimization
- Chance to contribute meaningfully at a pivotal moment in company's growth
- Collaborative and team-oriented startup culture
- Competitive salary with full benefits
