

**Employer:** IMTC

**Title:** Fullstack Developer (Full-Time)

**Location:** Hybrid, Preference for New York City area.

## The Company

IMTC is a NYC-based, venture-backed FinTech company, creating innovative technology solutions for fixed income professionals. IMTC's first-of-its-kind, cloud-based platform enables users to leverage a highly dynamic optimization engine along with a suite of automation tools to manage bond portfolios for retail and institutional clients. The combination of intuitive interfaces and purpose-built tools helps streamline time-intensive workflows so our clients can focus on high value work.

IMTC brings long awaited change to fixed income workflows. The platform enables customization on a massive scale allowing firms to grow their businesses and launch new products. By automating manual processes and optimizing decision-making, IMTC helps clients achieve faster, more accurate, and more compliant investment decisions across portfolios, simultaneously.

IMTC delivers end-to-end functionality, including portfolio construction, order management, analytics, reporting, compliance, risk management, and live pricing. With managed data services and an extensive network of integrations, IMTC ensures seamless connectivity by aggregating and centralizing data from a wide range of industry providers. Recognized for innovation and technology, IMTC stands as the only cloud-native tool dedicated to fixed income, providing flexibility, compliance, and comprehensive coverage across taxable and non-taxable markets.

The IMTC team combines fixed income industry expertise with experienced software developers to provide next-generation technology, delivering long-overdue automation and scale to fixed income teams. Today, IMTC proudly serves some of the country's top asset managers, Trust companies, RIAs, Broker-Dealers and ETF managers.

## The Opportunity

Following a successful Series A fundraise in 2024, IMTC is looking for an ambitious self-starter to play a key role in the growth of our rapidly expanding company. This is a rare opportunity to join a dynamic, forward-thinking team and make a meaningful impact as we revolutionize fixed income portfolio and order management.

You will be part of a team designing and developing advanced cloud solutions on MS Azure, with a foundation in agile working methods, DevOps, and Test-Driven Development. Given the frequency of our product releases, we have developed a toolbox of agile development practices which allow our Dev Team to release code in a highly dynamic flow. This means you can expect to see your own code in production during your first week on the job, whether you're at the beginning of your career or with several years of experience.

In addition to deploying continuous releases into production, automation is central to our development pipeline – everything from unit tests to integration tests, UI tests, and performance tests. As such, we avoid repetitive processes and in turn foster innovation and creativity. With this comes faster, higher-quality solutions and a greater business value. And, you will have the opportunity to learn from and work with seasoned technologists to effect real change in an industry ripe for disruption.

If you are looking for a fast-paced challenge, we want to hear from you!

### **Responsibilities:**

- Work with the Product, Implementation, and Client Success teams to ideate client-driven software solutions
- When new or complex features are created, you are at the forefront, driving development forward
- Develop both front- and backend functionality
- Ensure proper automated testing of code
- Troubleshoot, debug, and upgrade software

### **Qualifications:**

- Master of Software Development
- 7+ years of experience within software development
- Ability to deeply understand complex business flows
- Driven to writing extensible and testable code
- Mastery of C#
- Experience with frontend development, preferably Angular
- Used to working with version control, like Git
- Desire to work with the latest technologies in Azure and .NET Core
- Interest in an agile setup, where demands and direction are ever-changing while co-determination and freedom are paramount

### **What we offer:**

- Exciting, fast-paced work environment
- Hands-on experience in an early-stage startup with experienced founders
- Opportunity to assist in the development of next generation software
- Opportunity to explore ground-breaking ideas in cloud computing, optimization, and automation
- Chance to contribute meaningfully at a pivotal moment in the company's growth
- Collaborative and team-oriented startup culture
- Competitive compensation and benefits
